Designer: Sebastian Wrong, UK
Manufacturer: Established&Sons, UK

Promised Gift

Product: **Sci-Fi Vase**
Designer: Marc Newson, Australia
Manufacturer: Cor Unum, The Netherlands

Industrial design is the creation and development of concepts that optimize the function, value and appearance of products for our mutual benefit. It's everything we touch and use on a daily basis. It's the tools we use to keep our garden growing, the medical equipment that makes us healthy, the computer that promotes interaction and the lighting that supports good reading. It's the coffee pot whose aroma gets us going in the morning, the stove that cooks our food and the bed that puts us to sleep. Good design shapes the way we live by making our lives a little easier, our tasks more enjoyable and our interactions more fulfilling. From eco-friendly design to functionality, minimalism to the conceptual and even the avant-garde, it's innovation in design that allows us to experience ongoing moments of engagement and inquiry. *The Next Wave* is a voice for objects that are rigorous and challenging—yet also beautiful. Creating objects that are works of art in themselves, each project sparks a new dialogue, diffusing preconceived notions of design and art, beauty and function while still capturing the spirit of the times. This is *The Next Wave*.

—Douglas Burton, Curator
